Profile

Motivated Full Stack Web Developer and Pre-Final Year B.Tech Information Technology student at IIIT Bhubaneswar with strong foundations in Data Structures & Algorithms, MERN Stack Development, and Machine Learning. Passionate about building scalable web applications and solving real-world challenges through clean, efficient, and highly maintainable systems. Actively seeking Software Development Engineer (SDE) Internship and Full-Time engineering roles.

Education

International Institute of Information Technology (IIIT) <i>Bachelor of Technology in Information Technology (CGPA: 7.48)</i>	Bhubaneswar, Odisha 2023 – 2027
Delhi Public School, Nalco Nagar <i>Class XII (Senior Secondary) – Percentage: 88.6%</i>	Angul, Odisha 2021 – 2023
Delhi Public School, Nalco Nagar <i>Class X (Secondary) – Percentage: 98.2%</i>	Angul, Odisha 2020 – 2021

Projects

- Feasto** | *React.js, Node.js, Express.js, MongoDB, Razorpay, Cloudinary* [Source Code](#) | [Live Demo](#)
- Architected a scalable, full-stack food delivery application using the MERN stack, optimizing state management to support 250+ concurrent requests.
 - Deployed secure JWT user authentication protocols alongside role-based access control, decreasing unauthorized system entry risks to 0%.
 - Integrated Razorpay payment gateway API architecture to handle real-time transactional workflows with an automated 99.8% success rate validation.
 - Leveraged Cloudinary media storage buckets to handle performance-optimized asynchronous image uploads, reducing system payload by 35%.
- StayNest** | *Node.js, Express.js, MongoDB, EJS, Bootstrap, Cloudinary* [Repository](#) | [Live Demo](#)
- Spearheaded an accommodation hosting web application utilizing robust Model-View-Controller (MVC) paradigms to improve separation of concerns.
 - Constructed comprehensive structural data operations handling standard CRUD mechanics for user property listings, reviews, and interactive modules.
 - Accelerated system query response times by 40% by restructuring indexes and binding database schema instances onto MongoDB Atlas.
- Smart House Price Predictor** | *Python, Flask, Scikit-learn, Pandas, NumPy* [GitHub Link](#) | [Live Demo](#)
- Formulated advanced feature engineering processes, cleaning over 500,000+ variables to establish robust model benchmarks.
 - Trained and evaluated multiple regression machine learning models using Scikit-learn, achieving a 92% prediction accuracy validation rate.
 - Exposed underlying models via production-ready Flask routing handlers to support asynchronous UI operations and minimize request latency.

Technical Skills

Languages: Java, JavaScript, Python, SQL, HTML5, CSS3
Frameworks & Libraries: React.js, Node.js, Express.js, Flask, Tailwind CSS, Bootstrap, EJS
Databases: MongoDB, MongoDB Atlas, MySQL
Machine Learning: Scikit-learn, Pandas, NumPy, Matplotlib
Developer Tools: Git, GitHub, VS Code, Postman, Render, Cloudinary, Vercel
Core CS Foundations: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems

Achievements

- [Solved 200+ Data Structures & Algorithms](#) challenges using Java across competitive programming nodes.
- Maintained verified tracking profile benchmarks with live progress links available on [LeetCode](#) and [GeeksforGeeks](#).
