Portfolio | LeetCode | GeeksforGeeks

Profile

Pre-Final Year B.Tech Information Technology student at IIIT Bhubaneswar with expertise in Java, Data Structures & Algorithms, Full-Stack MERN Development, and Machine Learning. Experienced in developing responsive web applications, RESTful APIs, JWT-based authentication, and scalable backend systems using React.js, Node.js, Express.js, and MongoDB. Seeking Software Development Engineer Internship and Full-Time opportunities.

Education

International Institute of Information Technology (IIIT) — Bhubaneswar, Odisha
Bachelor of Technology in Information Technology (CGPA: 7.48) — *2023–2027*

Delhi Public School, Nalco Nagar — Angul, Odisha
Class XII – 88.6% — *2021–2023*

Delhi Public School, Nalco Nagar — Angul, Odisha
Class X – 98.2% — *2020–2021*

Projects

Feasto | *React.js, Node.js, Express.js, MongoDB, Razorpay, Cloudinary* — GitHub | Live Demo

- Engineered a full-stack food delivery application using React.js, Node.js, Express.js, and MongoDB following the MERN architecture.
- Implemented secure JWT-based authentication and role-based authorization for users and administrators.
- Integrated Razorpay payment gateway with online payment verification and order management functionality.
- Integrated Cloudinary for image storage and optimized media uploads while deploying the application on Render.

StayNest | *Node.js, Express.js, MongoDB, EJS, Bootstrap, Cloudinary* — GitHub | Live Demo

- Built a full-stack accommodation booking platform using Node.js, Express.js, MongoDB, and EJS following the MVC architecture.
- Implemented user authentication, property listing management, image uploads, reviews, and complete CRUD operations.
- Integrated Cloudinary for image management and MongoDB Atlas for scalable cloud database storage.

Portfolio Website | *React.js, Tailwind CSS, Vite, Framer Motion, EmailJS* — GitHub | Live Demo

- Designed a responsive personal portfolio using React.js, Tailwind CSS, Vite, Framer Motion, and EmailJS to showcase projects and technical skills.
- Built reusable React components with smooth animations and a mobile-first responsive design to provide an engaging user experience across devices.
- Integrated EmailJS for contact form functionality and deployed the application on Render with GitHub for version control and continuous updates.

Smart House Price Predictor | *Python, Flask, Scikit-learn, Pandas, NumPy* — GitHub | Live Demo

- Developed a machine learning web application using Python, Flask, Scikit-learn, Pandas, and NumPy to predict house prices based on user inputs.
- Performed data preprocessing, feature engineering, model training, and evaluation using regression algorithms in Scikit-learn.
- Deployed the trained machine learning model through a Flask-based web interface for real-time house price prediction.

Technical Skills

Languages: Java, JavaScript, Python, SQL, HTML5, CSS3
Frontend: React.js, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, EJS, REST APIs, JWT Authentication
Databases: MongoDB, MongoDB Atlas, MySQL
Machine Learning: Scikit-learn, Pandas, NumPy, Matplotlib
Developer Tools: Git, GitHub, VS Code, Postman, Vite, Render, Cloudinary, Vercel
Core CS Subjects: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems

Achievements

- Solved **200+ Data Structures & Algorithms** problems using Java across LeetCode and GeeksforGeeks.
- Built and deployed multiple full-stack web applications and machine learning projects using the MERN stack, Flask, and Scikit-learn.
